MAYOR GAVIN NEWSOM, SAN FRANCISCO, CALIFORNIA, GLOBAL WARMING, **SUN21**, 'THE UNSUSTAINABLES', PUBLIC UTILITIES COMMISSION, REVEREND SALLY BINGHAM

DAVID MUIR (ABC NEWS)

(OC) We turn now to this country and the end of a revolutionary voyage, as the **Sun21** is arriving in New York City today after a rather (inaudible) 7,000-mile journey from Spain.

DAVID MUIR (ABC NEWS)

(VO) Not only is it wind-powered, it is solar-powered, the first modern boat to ever cross the Atlantic without any oil or steam power.

DAVID MUIR (ABC NEWS)

(OC) So, today, we're gonna begin a week-long look at how individuals and how cities are doing what they can to reduce the effects of global warming. It's all part of our series, 'Going Green.'

BRIAN ROONEY (ABC NEWS)

(VO) They're installing solar panels at the baseball stadium to power the scoreboard. The Zen Center, contemplate this, and the city recycling center are solar-powered. The Episcopal cathedral has gone energy-efficient, and one of the priests preaches across the country that greenliness is next to godliness.

REVEREND SALLY BINGHAM (EPISCOPAL POWER AND LIGHT)

It's absolutely a religious issue. It's, it's about how we treat our fellow brothers and sisters.

BRIAN ROONEY (ABC NEWS)

(VO) There's even a locally produced cartoon show, 'The Unsustainables,' that pokes a little fun while spreading the word about going green.

THE GOAT ("THE UNSUSTAINABLES")

Harriet, you don't need 100,000 kilowatts of electricity to shine.

HARRIET ("THE UNSUSTAINABLES")

Well, I do try to maintain an inner glow.

BRIAN ROONEY (ABC NEWS)

(VO) San Francisco is where the desire to change how Americans live, the technical inventiveness of Silicon Valley and enormous sums of money to invest in new technologies all come together.

MAYOR GAVIN NEWSOM (DEMOCRAT)

I mean, the history of the city is always been one of not just dreaming but doing.

BRIAN ROONEY (ABC NEWS)

(VO) And the Public Utilities Commission will build offices they describe as the most energy-efficient building in the US, generating its own solar and wind power, 40% of its annual needs. And the elevators, powered by water pressure. Brian Rooney, ABC News, San Francisco.

DAVID MUIR (ABC NEWS)

(OC) Our series, 'Going Green.'
